

## Where can I learn more?

Visit the TAPUR™ Study website at [www.TAPUR.org](http://www.TAPUR.org) to learn more about the study including:

- ★ Information on eligibility for study
- ★ Latest news including study announcements and information related to results and publications
- ★ List of drugs available in the study
- ★ Up-to-date map of study site locations

## About ASCO

Founded in 1964, the American Society of Clinical Oncology, Inc. (ASCO®) is committed to making a world of difference in cancer care. As the world's leading organization of its kind, ASCO represents nearly 45,000 oncology professionals who care for people living with cancer.

Through research, education, and promotion of the highest-quality patient care, ASCO works to conquer cancer and create a world where cancer is prevented or cured, and every survivor is healthy. Conquer Cancer, the ASCO Foundation supports ASCO by funding groundbreaking research and education across cancer's full continuum.

Learn more at [www.ASCO.org](http://www.ASCO.org), explore patient education resources at [www.Cancer.net](http://www.Cancer.net), and follow us on [Facebook](#), [Twitter](#), [LinkedIn](#), and [YouTube](#).

## Questions?

We'd love to hear from you.  
Contact the TAPUR Study team at:

## TARGETED AGENT AND PROFILING UTILIZATION REGISTRY (TAPUR™) STUDY

**ASCO TAPUR**<sup>™</sup>

[WWW.TAPUR.ORG](http://WWW.TAPUR.ORG)

## What is the TAPUR Study, and why is it being conducted?

The Targeted Agent and Profiling Utilization Registry (TAPUR™) Study is a clinical trial for people with advanced cancer whose cancer is no longer responding to standard treatment or for whom there is no standard treatment available. A patient's cancer must also have a potentially actionable genomic variant already identified through a molecular profiling test (contact a participating TAPUR Study site for more information).

### The TAPUR Study aims to:

Learn whether approved drugs might work against different cancers

Find out how genomic or molecular tests are used to care for people with advanced cancer

Use the study results to help inform future studies and aid in the care of people with cancer

Provide patients with access to therapies which may benefit them

## Am I eligible?

Talk with your doctor about your treatment options, including clinical trials. If you agree with all of the below statements, you may be eligible for the TAPUR Study.

- ✓ I am at least 12 years old.\*
- ✓ I am not currently pregnant and do not plan to become pregnant soon.
- ✓ I have an advanced cancer (including solid tumors, multiple myeloma, and B cell non-Hodgkin lymphoma).\*\*
- ✓ My cancer is no longer responding to standard anti-cancer treatment, or no standard treatment is available.
- ✓ I have had a genomic or molecular profiling test performed on my cancer.
- ✓ I am out of bed and active at least half of each day.

\*Some restrictions apply. Not all TAPUR Study therapies are available for participants under 18 years of age.

\*\*Subject to cohort availability.

All drugs in the TAPUR Study are approved by the Food and Drug Administration (FDA) for treatment of cancer.

For more information on the study, please visit [www.TAPUR.org](http://www.TAPUR.org).

## What does the TAPUR™ Study involve?

If you are eligible for the TAPUR Study and decide to participate:

- ★ Your doctor will determine which therapy is best for you based on the results of a genomic test performed on your cancer. Although all the drugs in the TAPUR Study are approved by the FDA for at least one type of cancer, the therapy you would receive has not yet been approved for your specific type of cancer.
- ★ You will receive the study drug, an FDA-approved targeted anti-cancer therapy, at no cost to you.
- ★ The TAPUR Study will act in coordination with your routine clinical care visits performed by your doctor to monitor your health. At some of these visits, you will be evaluated to determine whether your cancer is responding to the therapy. Some participants may need to go to the doctor's office more frequently.

## Participating sites

The TAPUR Study is available at cancer centers and clinics throughout the United States.

Visit our website at [www.TAPUR.org/map](http://www.TAPUR.org/map) to see the full map of locations where patients may enroll in the TAPUR Study. Additional sites may be brought on throughout the course of the study. Please check the website frequently for updates.
